## RAACH SOLAR signs a 1.2MWp deal with Saudi Electric Company

Dubai, United Arab Emirates, 27.06.2017

**RAACH SOLAR signs a 1.2MWp deal with Saudi Electric Company (SEC) and underlines their position as premium solar power supplier with Solarworld, SMA, Schletter components Made in Germany.**

The companies FAISAL (United Arab Emirates), TAWREED (Saudi Arabia), and RAACH SOLAR (Germany) teamed up to work out a turn-key solution for a tailor made photovoltaic power system to supply four office towers of the new SEC headquarters in Riyadh, Saudi Arabia.

SEC is currently completing the construction of its new headquarters with a special focus on sustainability & renewable energies and selected the consortium in an international tender process. The consortium outperformed other bidders who offered components from leading manufacturers around the world.

“The design of the 1.2MWp roof mounted photovoltaic power plant is made for own consumption and zero feed-in ” explains Luka Kuki, project manager of RAACH SOLAR. “We convinced the customer not with the lowest investment cost, but with the lowest life cycle cost by using high class components with a long service life” adds Mr. Kuki. The 20° tilt angle photovoltaic array is installed on a steel structure at 4.5m on top of a terrace roof.

“We also would like to express our thanks to the companies Solarworld modules, SMA inverters and SCHLETTER supports for their continuous support of our business” adds Jürgen Raach, general manager of RAACH SOLAR.

#### About RAACH SOLAR

RAACH SOLAR engineers, procures, delivers, installs and maintains turn-key and tailor made photovoltaic systems worldwide. RAACH SOLAR is a premium supplier for open area photovoltaic power plants, building integrated photovoltaics (BIPV), carports, battery storage systems, AC mini grids, solar pumping systems, solar streetlights and consulting services.
